

WE CORDIALLY INVITE YOU.

SWISS ENGINEERED PUMPS SINCE 1947

EGGER

It all started 70 years ago in the autumn of 1947, when Mr. Emile Egger decided to establish his pump factory in Cressier, Neuchâtel. Today we can look back at a successful and exciting company history and forward to a promising future. As part of the 70th anniversary celebration, we would like to welcome you to our “pump seminar” in Neuchâtel, Switzerland. You will have the choice between a “wastewater seminar” with a focus on energy saving and low maintenance operation and an “industry seminar”

We are looking forward to welcoming you.

Friday, 8th September 2017 – Wastewater seminar

Greeting of the participants, short presentation on the 70th anniversary of Egger

Raw wastewater pumping challenges from the perspective of “TU Berlin” and “Berlin Wasserbetriebe BWB”

Inspection-free and maintenance-free pumping station / Egger pumps for raw wastewater pumping

Optimization and trouble-free operation of pumping stations with regard to energy cost reduction

Optimization of the aeration systems in wastewater treatment plants through energy- and process-related online parameters

**Reducing energy consumption in aeration systems with the Iris® diaphragm control valve
Product development Iris® 3rd generation**
